Demo Project Report

This model includes-

- Customer Registeration.
- Customer Login.
- An upload Portal for customer where they can upload their documents.
- Each customer can upload multiple documents from his/her account.
- Each Document will have a Title,Description and a max of 10 photos.
- Once a customer Uploads a document then, admin will receive a mail.
- Apart from these features every document can be viewed by clicking on its title.
- Each document can be edited & deleted by the customer.
- Also customer can change his/her Password.

I have also created another panel which is the Admin Panel

- This Panel manages all the registered users.
- Admin can block/unblock users, blocked users by admin cannot log in to their accounts.
- Management of all the Documents with their edit/delete.
- Admin can also reject a document & each rejected document.

To check received mail you can log on to:
